

Greensborough Residence - Client testimonial

We would like to take this opportunity to thank you and your staff for a great job in the design of our new home.

After many months of visiting display homes and feeling disappointed, we attended the HIA homeshow in Melbourne and were fortunate to hear you speak on energy efficient designed homes. A subsequent meeting in your office convinced us that you would design the home that we wanted. We knew that we had come to the right place. From the very beginning your enthusiastic staff were attentive to our needs, answered all of our questions and were very personable. You took our design brief and produced a home that has exceeded all of our expectations. It is a home that is easily maintained, very comfortable to live in and a great entertaining venue for small or large occasions.

What was truly interesting was the creative design process. Solar Solutions produced a stylish and uniquely designed house and your design concepts have produced a healthy environment in which we now live. The tradesmen who worked from your plans commented on their excellent detail and clarity. In particular our cabinet maker and electrician both noted they were the best plans they had ever worked from.

The process from beginning to completion was handled in a professional manner and consequently we decided to contract your firm again for our next building project of two investment units.

Thankyou so much Darren to you and your team for designing our fabulous home.
