

SOLAR SOLUTIONS CUSTOM HOMES

Solar Solutions Custom Homes is our premium design service, we can design you a custom home to suit your site, budget and lifestyle. A custom home is specifically designed to work with your site's microclimate, optimising the home's orientation whilst capturing any potential views. Once we have researched and visited your site we can design a home with minimal site impact and maximum energy efficiency.

Your new home will be modelled in 3D showing you the way the home works on the site as well as selecting colours and materials with you. We can design the home to suit the look that you want, a home that will be healthy and comfortable to live in all year round with minimal energy use. We also have a range of sustainable products that we can supply and deliver to your site at better than trade rates (Please refer to our products brochure).

WHAT'S INCLUDED?

Solar Solutions has different packages depending on the level of service you need (please refer over the page for these packages), you can mix and match these to suit you best. Below is a list of all the services we offer when designing a custom home:
