Hebel® PowerWall™ is a lightweight aerated concrete panel which is easy to install and has great thermal and insulation qualities.
Hebel® PowerFloor™ is an aerated concrete panel that is used in a subfloor double storey construction to enhance the thermal and insulation qualities.

Fletcher's Insulation is one of Australia's leading insulation companies. We are a recognised distributor of Fletcher's Insulation at competitive prices.

Concertina Foil Batts™ are a reflective ceiling insulation used to help reduce summer heat gain and keep you comfortable through summer months.

Sola Pergola™ is a louvre shading system which has been designed at a fixed angle to block the summer sun from your window yet allowing the warm winter sun to penetrate into your home.

Rinnai Solar™ manufacture quality solar hot water systems that Solar Solutions can supply at a competitive price.

Rinnai Smartstart® water saver has been developed to specifically reduce water wastage whenever a hot tap is turned on. The Smartstart® system allows you to pre-heat the water in the pipes before you turn on the hot tap.

DraftStoppa®

The DraftStoppa® is an innovative and inexpensive self-seal casing for ceiling exhaust fans containing a set of balanced shutters which open when the fan is turned on and close under their own weight when the fan is turned off. This Australian designed and manufactured product is aimed at reducing energy costs by preventing hot or cold air from entering the home via the ceiling exhaust fan.

DraftStoppa® TopHat™

The DraftStoppa® TopHat™ is an innovative, energy efficient, ducted ceiling exhaust fan incorporating the Award Winning DraftStoppa® concept.

Enviromax Thermostat Roof Ventilator

Enviromax-Thermostat Roof Ventilator is a high performance motorised ventilator, with 100% efficient even on hot still days it operates without the need of wind and will automatically turn on/off when needed. Low maintenance and low energy consumption with minimal heat loss during winter creates an excellent product that will reduce your roof temperature as desired.

ISO LITE™

Isolite™ manufacture a downlight cover that enables you to insulate up to the cover, creating a full blanket of insulation in your ceiling with no fire hazards.

FIREBREAK™ SERIES

Firebreak™ downlights are a fire proof enabling you to insulate up to the cover, creating a full blanket of insulation in your ceiling with no fire hazards.

A&A Worm Farm Waste Systems

A&A Worm Farm Waste Systems™ similar to septic tank systems processes sewerage, garbage and waste grey waters into a clear aerated, odour free liquid that waters your garden from below, just like on the rain forest floor. Avoid the chemical processes of septic tanks, GO NATURAL!

VENMAR

Rinnai Solar™ manufacture quality solar hot water systems that Solar Solutions can supply at a competitive price.

Rylock Windows and Doors™ are manufactures of high performance personalised thermally broken Aluminium windows and doors in Australia for over 50 years.

CertainTeed™ are manufactures of high quality uPVC windows.

Fairoak™ timber windows are manufactures of high quality custom made timber windows.

Paveworld™ supply all your paver, brick, natural stone, retaining wall, wall claddings, and lightweight building systems
