

# SOLAR SOLUTIONS HOME UPGRADES

Solar Solutions Home Upgrades provides a way to make your existing home more energy efficient and comfortable. Solar Solutions can organise a time to come to your existing house and do a report to determine the key areas that can be improved in your house. We will prioritise a list of improvements that can be achieved to improve your home, and you decide a timeline for when this can be performed.

Solar Solutions can organise the supply and installation of these products at better than trade rates and guarantee a significant increase of comfort in your home. The solutions are so simple, easy and cheap to do and will increase the home's comfort whilst decreasing its overall running cost.

## EASY WAYS TO IMPROVE YOUR HOME

Below are simple ways that you can improve the comfort of your home, they are often easier to achieve than you think. Call us today to find out more information.

### 1. SEALING

Sealing is a very important aspect of upgrading your existing home. Solar Solutions can organise the supply and installation of quality Raven products to seal your doors and windows. We can also organise to have all of your downlights sealed.

### 2. INSULATION

Using the right insulation in your home is critical, Solar Solutions can supply and recommend quality insulation solutions for your existing home. For a small cost the comfort of your home can be dramatically improved.

### 3. SHADING

Shading is a very cost effective way of reducing summer heat whilst still maximising the solar gain in winter. Solar solutions have specially designed a low maintenance, easy to install Sola Pergola System that is angled to let in winter sun and block out summer sun.

### 4. WATER SAVING

Solar Solutions can guide you on water saving methods that you can incorporate into your home. We can organise and supply water tanks as well as quality solar hot water systems from Solarhart.
